Subject: FW: Confidential - Draft Offsite Groundwater Sampling Locations
Attachments: Draft Proposed Temporary Well Location Map.pdf; Primary point adjustment.png

Carolyn

I am good with these points, but have one request for Amphenol – the eastern most sample (near the words “Agricultural Field” on the map and east of Glendale Drive) should be made a primary location. Before installation of the P&T system, IT-3 had higher concentrations of PCE and TCA than IT-2. The water table at IT-3 historically was lower than at IT-2, suggesting a southeasterly flow of groundwater may have been present. If a plume has been cut off since installing the P&T, I believe we may still see evidence of it at this point.

I understand Amphenol will likely have to get property access for this point, so for flexibility I am alright with them choosing to move it. See the attached for the range of locations they can move it to.

I’ll be back around 4:30 today if you want to talk more. I think we’re leaving Arcelor at 3 so I can be on the phone after that.

Conor

Subject: Confidential - Draft Offsite Groundwater Sampling Locations

Carolyn/Bhooma/Conor

Please see the attached draft figure displaying the proposed offsite groundwater sampling point locations. We used the existing offsite groundwater monitoring well data to assist in developing the sampling locations. If this looks OK, we can finalize the work plan and have it submitted to you tomorrow. As of now, we have the drilling company scheduled to complete the work activities next Tuesday – Thursday (if needed for all 3 days). If you have questions or want to discuss anything, please contact me.

Sincerely,

Bradley E. Gentry, LPG
